

What is new in the Helium Polish 4

August 14, 2007

Parameters of curve, head, point and wing facets are available in the semipolished report

Last version of the Helium polish 3.101 the names of facets were added into the illustrations for Semipolished Full report of Round Fancies. The names were added to the crown and pavilion view of pictures with brief indices:

H – Head
C – Curve
W – Wing
P – Point

In the new version of Helium Polish 4.0 the parameters of these facets output into semipolished report and text report.

The list of new parameters:

- Angle, azimuth and height for crown curve facets and pavilion curve facets
- Angle, azimuth and height for crown point facets and pavilion point facets
- Angle, azimuth and height for crown head facets and pavilion head facets
- Angle, azimuth and height for crown wing facets and pavilion wing facets
